

What is ImPACT?

INFORMATION FOR TEST TAKERS. PARENTS AND GUARDIANS

1. What does ImPACT mean?

ImPACT® stands for Immediate Post-Concussion Assessment and Cognitive Testing.

2. What is ImPACT?

ImPACT is an **objective tool to support trained healthcare providers in making sound return to activity decisions following concussions.** It's a computerized test that **measures memory, attention span, visual and verbal problem solving.** ImPACT has two primary uses: before the onset of an activity, a **baseline test** is conducted to measure the athlete's performance baseline. In the event of an injury, a **post-injury test** is administered and compared to the baseline and/or normative data scores.

3. Why use ImPACT?

Neurocognitive testing is the "cornerstone" of modern concussion management. It gives healthcare providers objective data to evaluate a patient's post-injury condition and aids in tracking recovery for safe return to activity.

4. Who is currently using ImPACT?

Thousands of **high schools, colleges, and universities**, thousands of **clinical centers**, hundreds of **Credentialed ImPACT Consultants**, hundreds of **professional teams**, and select **military units** choose ImPACT to assist in the management of concussion. Since 2002, ImPACT has served tens of millions of individual test takers.

5. ImPACT is NOT:

- A diagnostic test. ImPACT is one tool that can be used by medical professionals to help measure an individual's recovery from a concussion.
- A one step solution to concussions.
- A preventative tool. Nothing can truly prevent concussions.
- A substitute for medical treatment or management.
- · A replacement for a cat scan, MRI or other medical technology.
